Applicant's arguments filed 3/18/04 have been fully considered but they are not persuasive. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., the listed advantages of the instantly claimed invention and the introduction of sodium carbonate streams at points different than those before initial processing) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). The arrend ment to claim a specific action is some interpreted in the rejected specification.
